

GROWTH ROOM STANDARD OPERATING PROCEDURE

- ❖ Conduct a thorough check of plantlets daily.
- ❖ Remove Wilted and dried leaves when observed.
- ❖ All open outlets should be properly sealed.
- ❖ Ensure exit or entry door(s) to the growth room is closed at all times.
- ❖ The growth room must be free from dust and possible entry of insects and rodents.
- ❖ The growth room temperature should be maintained at 24-27°C.
- ❖ Avoid overcrowding plantlets in the SAH boxes.
- ❖ Ensure plantlets in the SAH boxes are not exposed to avoid contamination.
- ❖ Ensure the growth room is well lighted at a photoperiod of 14 hours light and 10-hour darkness
